MALAVIKA BINDHU KRISHNAN

Boston, MA | +1-781-793-4564 | krishnan.malavikab@gmail.com | https://www.linkedin.com/in/malavikabkrishnan/ | https://malavikak.github.io/

EDUCATION

Northeastern University — Boston, MA, United States
Master of Science (MS) in Data Analytics Engineering, GPA: 4.0/4.0 — **(Expected) Dec 2022**
- **Relevant Courses:** Data Management Analytics, Data Mining, Visualization, Probability and Statistics, Operations Research

Sree Chitra Thirunal College of Engineering — Trivandrum, Kerala, India
Bachelor of Technology in Computer Science, GPA: 3.9/4.0 — **July 2018**
- **Relevant Courses:** Data Structures and Algorithms, Distributed Systems, Computer Networks and Systems, Cryptography and Network Security, Data Mining, DB Systems, Object Oriented Programming, Operating Systems

SKILLS

Languages: *15,000 lines*: Python | *20,000 lines*: Java | R | C++
Machine Learning: scikit-learn, pandas, NumPy
Web: HTML, JavaScript, TypeScript, Angular, React, Node.js
Databases: Oracle SQL, PostgreSQL, MongoDB
Operating System: macOS, Windows, Android
Tools & Frameworks: Git, Jenkins, Selenium, Jira

EXPERIENCE

Suntec Business Solutions — Kerala, India | August 2018 - December 2020
Software Development Engineer; Full Stack
- Implemented product functionalities being part of an integrated team responsible for development and maintenance of the front-end to back-end of a customer-friendly user interface web application. Handled multiple clients and resolved issues promptly with **100% FTR (First Time Right)**.
- Configured solution-based customizations including front-end profiling on the main product for specific clients by modifying existing functionalities assuring product delivery with **98% FTR**.
- Introduced automated testing for core product functionalities including building libraries from scratch and managing CICD without failure daily ensuring proper product delivery and quality assurance.
- Worked with a team managed by the CEO responsible for proper documentation of files under TPE (Transaction Processing Engine) unit of the product and conducting presentations of recently introduced product features.
- **Tools & Frameworks**: Apache Maven, JavaScript, JAVA, Selenium, Oracle SQL, PostgreSQL, MariaDB, Eclipse, Git, JBoss

PROJECTS

Automatic Analysis of Examination Questions — SCTCE, Feb 2018 – May 2018
- Implemented a model and led a team of 3 to design, develop and test an automated system of classifying examination questions based on different cognitive levels.
- Integrated NLP, Iterative Deepening Depth-First Search algorithm and Trie data structure to build a model that classified questions for a miscellaneous level question paper with 86% accuracy (Published to Computer Society of India).

Statistical Analysis of Border Crossing Data — Northeastern University, Spring'21
- Performed descriptive and inferential statistical analysis on the US (United States) Border crossing data set and obtained trends and meaningful insights about how the number of vehicles, containers, and pedestrians entering the US via US-Canada and US-Mexico borders have changed over the past two decades.
- Performed Hypothesis test, T-test, A/B Test, Chi-Square Test and analyzed scenarios using various fitting distributions.

Online shopper's Purchasing Intent — Northeastern University, Spring'21
- Implemented several ML (Machine Learning) to predict the shopper's purchase probabilities after retrieving data from SQL database and visualizing trends using tools like Tableau.
- Developed end-to-end deployment of ML lifecycle and redesigned by fine tuning the model to improve accuracy.
- Incorporated techniques like Linear Regression, Logistic Regression, K-NN, Naïve Bayes, Decision Trees, Random Forest, Neural Networks, Principal Component analysis, and Clustering to achieve optimum model.

CERTIFICATIONS / EXTRACURRICULARS

Amazon Web Services (AWS) Cloud Practitioner Certification | Member of Computer Society of India
